Brief Introduction

Established in 1984, Henko Enterprise has been one intergrated group company of research,production and service in auto parts. Since 2002,we have successfully developed series electric fuel pumps and assemblies.

Henko Enterprise now has a floor area of 12, 000 square meters and more than 500 employees. Our electric fuel pump annual production capacity has reached 2,500,000 p.cs. In order to guarantee quality products in the production,every procedure is strictly refered to ISO/TS16949 system standard. Tested by the test center and on road after production,the performance of our products have become more stable and reliable.

Our products are suitable for the vehicles of V. W, Opel, Fiat, Mercedes, BMW, Ford, Honda and Hyundai etc. And we mainly export our goods to Europe and American.

OHSAS 18001:1999

TS16949

Dear Customers,

Taking the advantage of global opportunity and the help of customers, we have accomplished a great and meaningful development since the establishment of Henko. We wish to enhance the friendship and business relationship between our customers. We focus on our competencies in professionally manufacturing automotive parts and satisfactory service.

Our customer choose us for our reliability and quality of work. In the light of our common principles, we act in an innovative and reciprocal way. We are strongly determined to jointly achieve the goals with more and more customers in future.

We dedicate to our work, and we are proud to be part of Henko.

Professional Manufacturer

A group of professional staff are in charge of continuous exploration, development and perfection of product, technology, marketing and management system. Their excellent professional knowledge makes our products to be with pretty high reliability.
